

To Whom it may concern,  
Please reject the National Association of Broadcasters petition 04-160.

Satellite radio provides a wonderful service and should not be limited in it's scope as suggested by petition 04-160.

Satellite radio service is a dependable alternative to the hit and miss service that is offered by broadcast radio.

Competition should not be stifled. Let the broadcasters find a way to increase their own viability through innovation in their own broadcast market, rather than limiting satellite radio.

Respectfully,

Kevin Dunn
